

# The fastest-growing firms in the U.S. – 2023

By [Daniel Hood](#) March 14, 2023 9:00 AM

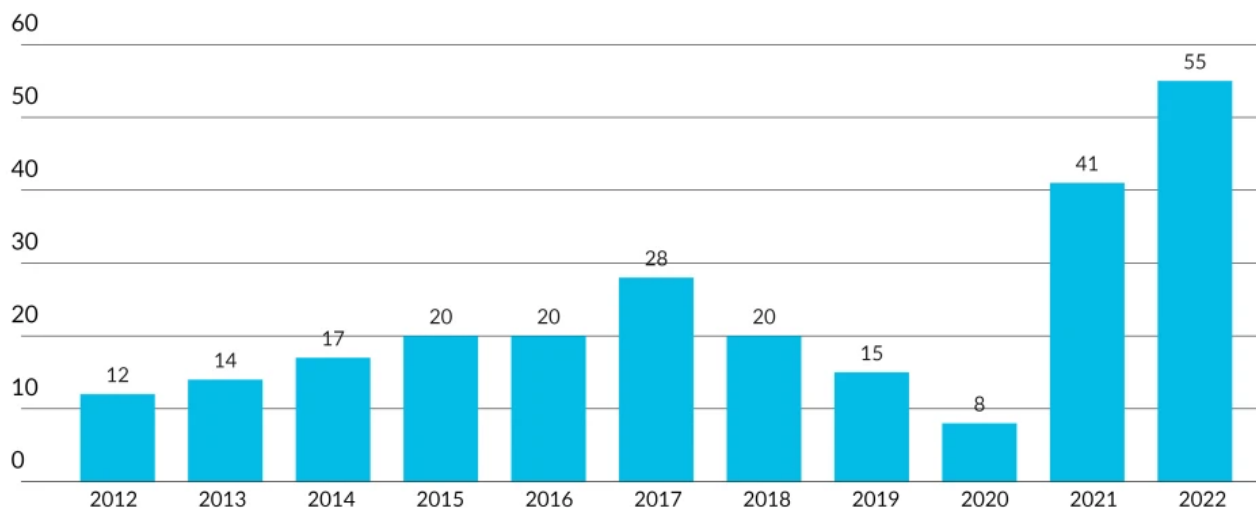

To have reported growth during the COVID pandemic was surprising; to have reported double-digit growth is nothing short of astonishing – and yet that's precisely what the largest firms in accounting did last year.

The firms in Accounting Today's 2023 Top 100 Firms roster of the largest practices in the country reported that their revenues grew by 18.55% in 2022, while the members of our Regional Leaders rankings reported average individual growth rates ranging from 10.52% to as much as 20.5%. (See the full [Top 100 and Regional Leaders report.](#))

Fully 69% of the firms in the Top 100 and Regional Leaders lists reported double-digit growth, and 55 firms reported growth about 20%, up from 41 last year. The fastest-growing firms from both lists are shown below, ranked by their growth rate.

## A great year for growth

No. of Top 100 Firms/Regional Leaders with revenue growth rates over 20%

Source: Accounting Today Top 100 Firms/Regional Leader Survey

Note: We did not include non-accounting firms from our Top Tax Firms list in this ranking, though it's worth noting that if we had, tax firm Ryan would have been on the list, with a jump in revenue of 34.55%.
